Good

I've started to build Moria about 75 times. One day i'll finish it.. Best 5\$ you'll spend on VR game. Totaly worth it!. The controls are absolutely horrible. No unit ever does what you want them to do. Combat itself looks interesting but I can't be bothered with these absolute horrible controls. I'm sure I bought the wrong game. I'm only in for 10 minutes and can't continue. All I have been doing so far is reading a loooooooooooooong introduction story and still didn't get to the end before finally starting to play. I wanted to play a game. If I want to read a book, I'd buy one!. This is Absolute Trash. I only bought this yesterday, and I am already fed up with it. The first level is extremely difficult to get through, and each time you fail you are forced to watch the same annoying game over cutscene over and over. I'd honestly work harder to get past it, but If the rest of the game is anything like the first level, I'd really rather not put up with it. The graphics and details look nice and all, but this game really bites. Maybe someday I will buy it again when there is a sale, but for now I'd rather have the 5 dollars.. Great controls\feel.

Great couch-coop.

Fantastic soundtrack.

Nice polished look.

Great use and mixtures of elements.

Love the scientist-rescues.

Highly recommended! One of my favorite games!. I really enjoyed this game. I got it on sale, and it was definitely worth it. It's a short, beautiful experience, so if that's what you're looking for you'll enjoy this too!. A boring gem matching exercise. To complete the game you do have to go through a lot of levels, just gets a bit tedious really.

its a fun wave shooter, especially if youre into steam punk
be warned though, its rather short and in my opinion not as polished as space pirate trainer and others...

for 5\$ id recommend it, not really for more than that.... Lovely game!

As a point-and-click admirer, and a long-running gamer when it comes to the genre, I am always looking for good titles to enjoy. Most of the times, the games claim to be oh-so-great, but end-up being oh-so-abysmal.

Maggie's Apartment is exactly the opposite - the game makers claim ot have created a fun small game. And that's exactly what they did.

I am not sure the topic or the plot would be as enjoyable for the male audience as it would be for the female, but come on - who hasn't had a near-stupid crush on a celebrity?

The game is fun and full of puns and jokes. Exactly what the trailer suggests. 3-4 hours filled with loveliness. Not to mention the way Maggie moves around. I adore the way she looks. Such a cute thing!

Hope you make more games like this one. I would definitely follow your careers, guys :). its good for its price. Puzzle point-and-click game, despite what you might think this combo works quite nicely. Managed to finish in about 4 hours without any great difficulty. Almost all the ideas here are extremely well thought out, and as such most puzzles are very satisfying to overcome.

However, lack of polish on a couple of mid-to-late levels meant the solutions were sometimes a little more frustrating than they could have been. A particular gripe on the last level required me to restart the entire level to correct my mistake.

The camera also becomes the surprise antagonist by the end, and some minor keyboard gymnastics were needed to keep the camera from driving me completely mad.

Still very happy with time and money spent on this game, and hope this encourages Longbow Games to try their hand at this style more often, though perhaps with a bit more polish next time!. Hugs are good. Um Kay!. This game seriously needs a reboot. Sadly, the community overlooked this multiplayer gem! It is a game that quite honestly simulates a Godzilla attack where one person plays the rampaging beast and every other player does their best to stop it! The players have opportunities to access other vehicles and such weaponry while the beast can upgrade their attacks.

I had the fortunate event of playing it in its true form with a group of friends, but it did not last long as there are obviously better games out there, but with the right delivery this can really stand above the ashes as a phoenix worth documenting. Please bring it back!. finding iron is harder than finding a full set of iron armor. One of the greatest Vn ever! Cant get enough.. Good game, great graphics, good characters, voice-acting for Ghost is exellent. Enjoyed the game immensely. Then i meet the first boss. It is broken. Some reviewers say it is too hard, but it's just broken. I was happily playing on medium, but even on easy this thing can be beaten only by pure luck, insane amount of grind (or equally insane amount of skill that few of us need). And even after you kill it, it still can kill you. This is just stupid. I don't want to fight this abomination again until it's fixed.

Games must be enjoyable. If you want your game to be hard - that's ok, Dark Souls is enjoyable and hard game at the same time. The key is consistency - the very first enemy in DS can kill you easily and you have to take things seriously (and run). In this game you walk your way to the first boss without any difficulty. You explore, laugh, fight and all of this is very light-hearted and casual. Then you meet this broken boss, and instead of fun you get only anger. No, thank you.

If you want to play something like this game but without broken bosses, i recommend Dex.

UPD: Changed my recomendation from negative to positive. Yes, i was really angry but negative is too strong. After i beat that damned thing i had great time playing. Still think first boss is broken (second one is walk in the park in comparison).. Sad to say, but I think this game is bland. I played through the first mission of the campaign and I usually like adventurous settings, but this didn't get me excited at all. They tried to enhamce Zombie Army with some added mechanics, like traps, magic and switch puzzles, loot and weapom upgrades but they didn't hit to spot of gripping gameplay. It is shiny and shallow, maybe nice for the casual player.
